Data source: Canadian Institute for Health Information, Discharge Abstract Database (CIHI-DAD), 2003/04–2010/11.

Inclusion criteria: Patients aged ≥18 years.

Exclusion criteria: Patients with elective admissions.

¹ Based on unique patients (i.e., does not include multiple patient-visits).

² Stroke, not specified as hemorrhagic or infarction.

** Cell value suppressed for reasons of privacy and confidentiality.

Note:

Facility-based analysis (i.e., the location of the facility is used to report regional performance).

Data sources: Canadian Institute for Health Information, National Ambulatory Care Reporting System (NACRS), 2003/04–2010/11; Statistics Canada, Ontario intercensal population estimate, 2003.

Inclusion criteria: All patients aged ≥18 years with a diagnosis of stroke (ischemic or hemorrhagic) or transient ischemic attack.

Exclusion criteria: Patients with a scheduled emergency department visit.

¹ Based on unique patients (i.e., does not include multiple patient-visits).

² Age- and sex-adjusted rates using each year's Ontario population as the standard.

³ Age- and sex-adjusted rates using the 2003/04 Ontario population as the standard.

Notes:

(1) Population-based analysis (i.e., the location of the patient's residence is used to report regional performance).

(2) Excludes patients with missing postal codes.

(3) Excludes all NACRS records with ICD codes that include the prefix "Q" (suspected, questionable diagnoses) starting in 2008/09.

(4) Indicates a significant difference from the provincial rate at the p<0.05 level.

Data source: Registry of the Canadian Stroke Network, Ontario Stroke Audit (OSA), 2002/03, 2004/05, 2008/09 and 2010/11.

Inclusion criteria: All patients aged ≥18 years admitted to an acute care facility in Ontario with a final diagnosis of stroke or transient ischemic attack.

Exclusion criteria: Patients taken directly to an operating room from the emergency department.

¹ A stroke unit is defined as a specialized, geographically-located hospital unit with a dedicated stroke team and stroke resources (e.g., a care pathway, educational materials, monitored beds). This unit does not need to have all of these resources nor does it have to be exclusive to stroke patients, but it must be in one location in the hospital.

² Facility values are unweighted.

** Cell value suppressed for reasons of privacy and confidentiality.

Notes:

(1) Facility-based analysis (i.e., the location of the facility is used to report regional performance).

(2) This indicator measures care on a stroke unit/cluster occurring at any time during hospital admission. This differs from the "stroke unit" indicator measured in the 2002/03 audit, where only the initial admission to a stroke unit was captured, rather than stroke unit care at any point in time.

(3) North York General, Southlake Regional and York Central hospitals were not considered to have a stroke unit at the time of abstraction for the 2008/09 audit. Timmins and District, Bluewater Health-Sarnia and Glengary Memorial hospitals established stroke units in the 2010/11 fiscal year and were not considered to have a stroke unit at the time of abstraction for the 2010/11 audit.

(4) Cells in which there were no reported/available data are marked with a hyphen (-).

Exhibit 2.5s-1 (continued)

Inpatient length of stay for adults with stroke or transient ischemic attack, in Ontario and by facility, 2003/04 and 2008/09–2010/11

Data source: Canadian Institute for Health Information, Discharge Abstract Database (CIHI-DAD), 2003/04–2010/11.

Inclusion criteria: All stroke and TIA patients aged ≥ 18 years admitted to an acute care facility in Ontario for stroke management.

¹ Based on unique patients (i.e., does not include multiple patient-visits).

² A patient is designated Alternate Level of Care (ALC) by a physician or his/her delegate when the patient is occupying a bed in a hospital and does not require the intensity of resources/services provided in the current care setting (acute, complex continuing care, mental health or rehabilitation). The ALC wait period starts at the time of designation and ends at the time of discharge/transfer to a discharge destination (or when the patient's needs or condition changes and the designation of ALC no longer applies). The standardized provincial ALC definition was implemented across all acute care facilities in Ontario on July 1, 2009.

** Cell value suppressed for reasons of privacy and confidentiality.

Notes:

(1) Facility-based analysis (i.e., the location of the facility is used to report regional performance).

(2) Cells in which there were no reported/available data are marked with a hyphen (-).

Data source: Canadian Institute for Health Information, Discharge Abstract Database (CIHI-DAD), 2003/04–2010/11.

Inclusion criteria: All stroke and TIA patients aged ≥18 years admitted to an acute care facility in Ontario for stroke management.

¹ Based on unique patients (i.e., does not include multiple patient-visits).

Note:

Facility-based analysis (i.e., the location of the facility is used to report regional performance).

Exhibit 2.6s

Number and percentage of adult patients with documentation that an initial dysphagia screening¹ was performed during admission to acute care, in Ontario and by facility, 2002/03, 2004/05, 2008/09 and 2010/11

Data source: Registry of the Canadian Stroke Network, Ontario Stroke Audit (OSA), 2002/03, 2004/05, 2008/09 and 2010/11.

Inclusion criteria: All patients age ≥18 years admitted to an acute care facility in Ontario with a final diagnosis of stroke.

Exclusion criteria: Patients with a diagnosis of transient ischemic attack; patients who were unconscious at the time of initial assessment while in hospital.

¹ Speech language pathology assessment or swallowing screen was performed within 72 hours of patient arriving at hospital. This includes bedside assessments done by health care providers (e.g., nurses) or standardized swallowing screening tests (e.g., TOR-BSST).

² Facility values are unweighted

** Cell value suppressed for reasons of privacy and confidentiality.

Notes:

(1) Facility-based analysis (i.e., the location of the facility is used to report regional performance).

(2) Cells in which there were no reported/available data are marked with a hyphen (-).

Data source: Canadian Institute for Health Information, Discharge Abstract Database (CIHI-DAD), 2003/04–2010/11.

Inclusion criteria: All stroke and TIA patients aged ≥18 years admitted to an acute care facility in Ontario for stroke management.

Exclusion criteria: Patients with elective admissions.

¹ Based on unique patients (i.e., does not include multiple patient-visits).

² Rates are adjusted for age, sex and stroke type, using each year's Ontario population as the standard.

** Cell value suppressed for reasons of privacy and confidentiality.

Notes:

(1) Facility-based analysis (i.e., the location of the facility is used to report regional performance).

(2) Cells in which there were no reported/available data are marked with a hyphen (-).

Data source: Canadian Institute for Health Information, Discharge Abstract Database (CIHI-DAD), 2003/04–2010/11.

Inclusion criteria: All patients aged ≥18 years discharged alive from an acute care hospital in Ontario with a diagnosis of stroke or transient ischemic attack.

Exclusion criteria: Patients with elective admissions.

¹ Based on unique patients (i.e., does not include multiple patient-visits).

² Includes long-term care nursing homes and long-term care homes for the aged.

³ Includes palliative care.

** Cell value suppressed for reasons of privacy and confidentiality.

Notes:

(1) Facility-based analysis (i.e., the location of the facility is used to report regional performance).

(2) Cells in which there were no reported/available data are marked with a hyphen (-).

Exhibit 2.9s

Number and percentage of adult ischemic stroke patients without atrial fibrillation who received carotid imaging while in hospital or had an appointment booked for carotid imaging prior to hospital discharge, in Ontario and by facility, 2002/03, 2004/05, 2008/09 and 2010/11

Data source: Registry of the Canadian Stroke Network, Ontario Stroke Audit (OSA), 2002/03, 2004/05, 2008/09 and 2010/11.

Inclusion criteria: All ischemic stroke patients aged ≥18 years without atrial fibrillation admitted as an inpatient in any acute care facility in Ontario (N = 7,718 in 2002/03, 7,169 in 2004/05, 6,969 in 2008/09 and 6,327 in 2010/11).

¹ All patients who received carotid imaging during their hospital stay i.e. prior to discharge

² All patients who did not undergo carotid imaging during their hospital stay but had an appointment booked for carotid imaging after discharge (N = 3,839 in 2002/03, 2,981 in 2004/05, 1,760 in 2008/09 and 1,345 in 2010/11)

³ Facility values are unweighted.

** Cell value suppressed for reasons of privacy and confidentiality.

Notes:

(1) Facility-based analysis (i.e., the location of the facility is used to report regional performance).

(2) Cells in which there were no reported/available data are marked with a hyphen (-).

Data sources: Canadian Institute for Health Information, Discharge Abstract Database (CIHI-DAD), 2003/04–2010/11 and National Ambulatory Care Reporting System (NACRS), 2003/04–2010/11.

Inclusion criteria: All patients aged ≥18 years who visited or were admitted to an acute care hospital for stroke or transient ischemic attack and underwent carotid revascularization through carotid endarterectomy or carotid stenting within 6 months of the index acute stroke/TIA hospitalization admission date starting in 2003.

¹ Based on unique patients (i.e., does not include multiple patient-visits).

** Cell value suppressed for reasons of privacy and confidentiality.

Notes:

- (1) Degree of stenosis in patients requiring carotid revascularization is unavailable in administrative databases.
- (2) SubLHIN planning area data not included, as most carotid endarterectomies and carotid stenting are done at the 11 regional and enhanced district stroke centres.
- (3) Facility-based analysis (i.e., the location of the facility where the index stroke event occurred is used to report regional performance).
- (4) Cells in which there were no reported/available data are marked with a hyphen (-).

Data source: Registry of the Canadian Stroke Network, Ontario Stroke Audit (OSA), 2002/03, 2004/05, 2008/09 and 2010/11.

Inclusion criteria: All patients aged ≥18 years discharged alive from the emergency department or inpatient care with a final diagnosis of ischemic stroke or transient ischemic attack.

¹ Includes antiplatelet, lipid-lowering and antihypertensive therapies.

² Facility values are unweighted.

** Cell value suppressed for reasons of privacy and confidentiality.

Notes:

(1) Facility-based analysis (i.e., the location of the facility is used to report regional performance).

(2) Patients with contraindications to any secondary prevention medications were not excluded from this analysis.

(3) For patients with atrial fibrillation, anticoagulant therapy (prescribed or recommended) was included as an appropriate secondary prevention medication in lieu of an antiplatelet therapy.

(4) Cells in which there were no reported/available data are marked with a hyphen (-).
