## Study Population

All active Ontario physicians.

## Time Frame

The study reports physician payments for Ontario and by specialty for the years 2005/06 to 2017/18. Although previous reports have included payment estimates for 2000/01 to 2004/05 as well, the data for these years are known to be incomplete. The decision was made to exclude these early years to ensure comparable data across all years with respect to trends over time.

## Inclusion/Exclusion Criteria

### Cohort inclusion criteria

Physicians were included if they had an Ontario postal code and payments in at least one of the payment databases held at ICES: OHIP, Architected Payments and GAPP/DSS. Physicians whose total payments for the year were negative (-) were not included in the final totals.

### Cohort exclusion criteria

Out of province physicians, out of country physicians and clinical fellows were excluded from the physician totals. Claims that included dummy physician numbers (e.g., for processing reciprocal medical billings), duplicate claims and technical fees were excluded when estimating payment totals and calculating physician full-time equivalents (FTEs). Physicians were excluded if their total payments from all sources was  $\leq 0$ .

## Specialty Groupings

For the purpose of calculating FTEs, specialties were grouped as follows:

- All pediatric medical subspecialties were aggregated as Pediatric Subspecialties.
- GP/FP includes Community Medicine/Public Health and physicians from any other specialty whose functional specialty was GP/FP. FP/Emergency Medicine physicians were only included if their functional specialty was GP/FP; otherwise, they were included with Emergency Medicine.
- Medical Genetics and Neonatal-Perinatal Medicine were included with Pediatrics.
- Gynecological Oncology was included with Obstetrics & Gynecology (OB/GYN).
- Pediatric General Surgery was included with General Surgery.
- Medical Biochemistry and Medical Microbiology were combined into Laboratory Medicine.
- Hematological Pathology and Neuropathology were included with General Pathology.
- Occupational Medicine was included with Internal Medicine.

No FTE was calculated for physicians or physician numbers identified as 'Dummy Number,' 'Fellow,' 'Out of Country' or 'Out of Province.'

## Analysis

The total payment amount for each physician for each year was calculated by summing payments from all sources. For the purpose of calculating FTEs, specialties with small numbers of physicians (such as Pediatric Subspecialties) were grouped together.

Each physician's specialty during a given year was based on their self-reported specialty, which was then compared with their practice-based specialty.

An FTE was calculated for each physician. This is a relative number that indicates where a physician's total payments fall on the distribution of payments within their specialty using the methodology developed by Health Canada.

For each grouped specialty, the mean total payments per physician and per FTE were calculated. We also calculated the median and percentiles for total payments per physician by specialty.

We also report the total payments to all physicians in the specialty for each year and the breakdown by payment source (i.e., Fee-for-Service (FFS), Academic Health Science Centre (AHSC), Alternate Payment Plan (APP), Emergency Department Alternative Funding Agreement (EDAFA), Primary Care Model, and Other). In accordance with the ICES re-identification risk assessment policy, payment sources were combined into an All Others category where there were payment amounts from one or more sources that were based on fewer than 6 physicians. An empty cell indicates no payments from the source in the year indicated.

For primary care physicians, an additional analysis breaks out their mean payments by primary care model and payment category. An empty cell indicates no payments fell within the category in the year indicated.

Note: The mean payments by payment category includes only physicians who had payments in that category. Here is an example of how to correctly interpret these numbers: Of the physicians in Family Health Groups who received bonuses in 2013/14, the average amount received was \$9,258.77. This does not take into account physicians in this group who did not receive bonus payments during the year.

Comparison of physician payments in Ontario, overall and by specialty, 2011/12 to 2017/18
