Notes:

Cancer surgeries: Age- and sex-adjusted rate per 100,000 population aged 40 years and older; except radical prostatectomy (age-adjusted only) and hysterectomy (age-adjusted only)

Cardiac procedures: Age- and sex-adjusted rate per 100,000 population aged 20 years and older

Cataract surgery: Age- and sex-adjusted rate per 100,000 population aged 20 years and older

Total hip/knee replacement: Age- and sex-adjusted rate per 100,000 population aged 20 years and older

Computed tomography(CT)/Magnetic resonance imaging (MRI) scans: Age- and sex-adjusted rate per 100,000 population aged 0–75+ years

Notes:

Recommended Maximum Wait Time = RMWT

Coronary angiography: Urgent = RMWT of 0–7 days; Semi-Urgent = RMWT of 8–28; days; Elective = RMWT of 29 days or greater

Angioplasty: Overall = combination of referral from in-hospital and from home

Bypass surgery: Urgent = RMWT within 14 days; Semi-Urgent = RMWT of 14–42 days; Elective = RMWT 43–180 days

The above urgency categories are based on clinical characteristics at time of referral.

Cancer surgeries: Important differences in the management of different cancer types prohibit the development of a single target wait time between consultation and surgery for all cancer surgeries.

Cataract surgery: RMWT = 16 weeks

Total hip/knee replacement: RMWT = 26 weeks

CT/MRI scans: Due to lack of data, average length of time from request to completion, and therefore, median wait time, was not determined.
