

# Year in Numbers

# Our People

ICES is a community of research, staff and scientists located at seven sites (Central, McMaster, North, Queen’s, UofT, uOttawa, Western) across Ontario. People outside of our organization can also access data to answer important research questions. This is part of our commitment to keep data accessible.

## Year in Numbers

# Research Capacity

Since 1992, ICES scientists and data experts have been developing and expanding the ICES data repository, which includes a vast, secure number of linked and encoded health-related data. New data partnership increase research capacity to inform the delivery of evidence-based healthcare in Ontario, across Canada and abroad.

## Year in Numbers

# Knowledge Generation

In addition to projects led by ICES scientists, the ICES Data & Analytic Services division (ICES DAS) and Applied Health Research Question Program (AHRQ) offer services to researchers and students to access research-ready, linked health administrative data and analytic tools. The goal for these programs is to inform planning, policy or program development that will benefit the Ontario healthcare system.

## Year in Numbers

 <b>352</b> new investigator-driven projects	 <b>20</b> completed AHRQ requests
<b>1174</b> ongoing investigator-driven projects	<b>143</b> public and private sector requests to ICES Data & Analytic Services (DAS)
<b>32</b>	new AHRQ requests <b>received from 26 unique knowledge users</b>
<b>584</b>	peer-reviewed publications

# Knowledge Translation

ICES strives to translate research findings through investigative reports, media releases, infographics and our website, with the intent to engage researchers, stakeholders, healthcare leaders, and the public in important dialogue around healthcare practice and policy change.
