AUTHORS’ AFFILIATIONS

Gillian L. Booth, MD, MSc
Scientist, Centre for Research on Inner City Health, Keenan Research Centre, Li Ka Shing Knowledge Institute of St. Michael’s Hospital / Staff Endocrinologist, Department of Medicine, St. Michael’s Hospital / Adjunct Scientist, Institute for Clinical Evaluative Sciences / Associate Professor, Department of Medicine and Institute of Health Policy, Management and Evaluation, University of Toronto

Jane Y. Polsky, MSc, PhD(c)
Research Coordinator, Centre for Research on Inner City Health, Keenan Research Centre, Li Ka Shing Knowledge Institute of St. Michael’s Hospital / PhD candidate, Dalla Lana School of Public Health, University of Toronto

Peter Gozdyra, MA
Medical Geographer, Institute for Clinical Evaluative Sciences / Centre for Research on Inner City Health, Keenan Research Centre, Li Ka Shing Knowledge Institute of St. Michael’s Hospital

Karen Cauch-Dudek, BA
Project Manager and Program Lead Research Coordinator, Institute of Clinical Evaluative Sciences

Tara Kiran, MD, MSc
Clinical Lead, Ontario Diabetes Strategy, Ontario Ministry of Health and Long-Term Care / Staff Physician, Department of Family and Community Medicine, St. Michael’s Hospital / CIHR Strategic Training Fellow, ACHIEVE Research Partnership, Centre for Research on Inner City Health, Keenan Research Centre, Li Ka Shing Knowledge Institute of St. Michael’s Hospital / New Investigator, Department of Family and Community Medicine, University of Toronto

Baiju R. Shah, MD, PhD
Scientist, Institute for Clinical Evaluative Sciences / Scientist, Sunnybrook Research Institute / Staff Endocrinologist, Department of Medicine, Sunnybrook Health Sciences Centre / Assistant Professor, Department of Medicine and Institute of Health Policy, Management and Evaluation, University of Toronto

Lorraine L. Lipscombe, MD, MSc
Scientist, Women’s College Research Institute / Staff Endocrinologist, Department of Medicine, Women’s College Hospital / Adjunct Scientist, Institute for Clinical Evaluative Sciences / Assistant Professor, Department of Medicine, University of Toronto

Richard H. Glazier, MD, MPH
Scientist, Centre for Research on Inner City Health, Keenan Research Centre, Li Ka Shing Knowledge Institute of St. Michael’s Hospital / Senior Scientist, Institute for Clinical Evaluative Sciences / Staff Physician, Department of Family and Community Medicine, St. Michael’s Hospital / Professor, Department of Family and Community Medicine and Dalla Lana School of Public Health, University of Toronto

ACKNOWLEDGEMENTS

This document is the product of many collaborative efforts. The authors wish to acknowledge the contributions of the following individuals at the Institute for Clinical Evaluative Sciences: Anjie Huang, Data Analyst; Susan Shiller, Director, Communications; and Nancy MacCallum, Editor and Publications Coordinator.

We would also like to thank the staff of the Diabetes Regional Coordination Centres for their invaluable input on the selection of measures presented in this report.
ABOUT THE INSTITUTE FOR CLINICAL EVALUATIVE SCIENCES

The Institute for Clinical Evaluative Sciences (ICES) is an independent, non-profit organization that produces knowledge to enhance the effectiveness of health care for Ontarians. Internationally recognized for its innovative use of population-based health information, ICES evidence supports health policy development and guides changes to the organization and delivery of health care services.

Key to our work is our ability to link population-based health information, at the patient level, in a way that ensures the privacy and confidentiality of personal health information. Linked databases reflecting 13 million of 33 million Canadians allow us to follow patient populations through diagnosis and treatment and to evaluate outcomes.

ICES brings together the best and the brightest talent across Ontario. Many of our scientists are not only internationally recognized leaders in their fields but are also practicing clinicians who understand the grassroots of health care delivery, making the knowledge produced at ICES clinically focused and useful in changing practice. Other team members have statistical training, epidemiological backgrounds, project management experience or communications expertise. The variety of skill sets and educational backgrounds ensures a multi-disciplinary approach to issues and creates a real-world mosaic of perspectives that is vital to shaping Ontario’s future health care system.

ICES receives core funding from the Ontario Ministry of Health and Long-Term Care. In addition, our faculty and staff compete for peer-reviewed grants from federal funding agencies, such as the Canadian Institutes of Health Research, and receive project-specific funds from provincial and national organizations. These combined sources enable ICES to have a large number of projects underway, covering a broad range of topics. The knowledge that arises from these efforts is always produced independent of our funding bodies, which is critical to our success as Ontario’s objective, credible source of evidence guiding health care.

“ICES brings together the best and the brightest talent across Ontario. Many of our scientists are not only internationally recognized leaders in their fields but are also practicing clinicians who understand the grassroots of health care delivery.”
